

CALL FOR PAPERS

TECHNICAL COMMITTEE

Chairs

Associate Professor Fidelis Mashiri
Western Sydney University, Australia
Email: F.Mashiri@westernsydney.edu.au

Professor Zhong Tao
Western Sydney University, Australia
Email: z.tao@westernsydney.edu.au

Secretary

Dr Kamrul Hassan
Western Sydney University, Australia
Email: K.Hassan@westernsydney.edu.au

KEY DATES

10 March 2020: Abstract submission opens

30 May 2020: Abstract submission closes

**15 June 2020: Abstract review outcome
emailed to authors**

15 Sep 2020: Full paper submission closes

**1 June 2020: Registration to conference
opens**

30 Sep 2020: Early bird registration closes

22 – 26 Nov 2020: Conference days

REGISTRATION FEE

Full Delegate: AU \$79

Student: AU \$450

Day rate for one day: AU \$400

Conference dinner: AU \$100

One registration allows two papers
AU \$200 (for each of additional papers)

VENUE

Western Sydney University
Parramatta South Campus, Sydney, Australia

The International Conference on Structural Engineering Research (iCSER-2020) will be held on 22-26th November 2020, Sydney, Australia. It is jointly organised by the School of Engineering at Western Sydney University, Sydney, Australia and Global Circle for Scientific, Technological and Management Research (GCSTMR) as part of its 6th World Congress.

iCSER-2020 will feature Keynote addresses by world leaders in Structural Engineering. All the abstracts and full papers submitted to iCSER-2020 will be refereed by two independent reviewers and the accepted papers will be published in the conference proceedings with Australian ISBN Number.

Topics of interest include, but are not limited to the following :

- Building structures, bridge structures and underground structures
- Novel hybrid structural systems and composites structures
- Prefabricated structures
- Large scale and complex infrastructure and spatial structures
- Earthquake engineering
- Earthquake engineering
- Advanced structural experimental techniques
- Advanced sensor networks, structural monitoring and control
- Performance-based design
- Disaster-prevention and hazard mitigation for infrastructure
- Construction monitoring and control for large-scale structures
- Reliability and durability of structures
