

CALL FOR PAPERS

TECHNICAL COMMITTEE

Chairs

Associate Professor Fidelis Mashiri

Western Sydney University, Australia

Email: F.Mashiri@westernsydney.edu.au

Professor Zhong Tao

Western Sydney University, Australia

Email: Z.Tao@westernsydney.edu.au

Conference Secretary

Dr Md Kamrul Hassan

Western Sydney University, Australia

Email: K.Hassan@westernsydney.edu.au

KEY DATES

10 March 2022: Abstract submission opens

30 May 2022: Abstract submission closes

15 June 2022: Abstract review outcome
emailed to authors

15 Sep 2022: Full paper submission closes

1 June 2022: Registration to conference opens

30 Sep 2022: Early bird registration closes

27 – 30 Nov 2022: Conference days

REGISTRATION FEE

Full Delegate: AU \$795

Student: AU \$450

Day rate for one day: AU \$400

Online presentation via ZOOM: AU \$250

Conference dinner: AU \$100

One registration allows two papers AU
\$200 (for each of additional papers)

VENUE

Western Sydney University

Parramatta South Campus, Sydney, Australia

The International Conference on Structural Engineering Research (iCSER-2022) will be held on 27-30th November 2022, Sydney, Australia. It is jointly organised by the School of Engineering at Western Sydney University, Sydney, Australia and Global Circle for Scientific, Technological and Management Research (GCSTMR) as part of its 6th World Congress.

iCSER-2022 will feature Keynote addresses by world leaders in Structural Engineering. All the abstracts and full papers submitted to iCSER-2022 will be refereed by two independent reviewers and the accepted papers will be published in the conference proceedings with Australian ISBN Number.

Topics of interest include, but are not limited to the following :

- Building structures, bridge structures and underground structures
- Novel hybrid structural systems and composites structures
- Large scale and complex infrastructure and spatial structures
- Prefabricated structures
- Structural fire engineering
- Earthquake engineering
- Advanced structural experimental techniques
- Performance-based advanced design and analysis
- Numerical analysis of structures using finite element modelling
- Advanced sensor networks, structural monitoring and control
- Disaster-prevention and hazard mitigation for infrastructure
- Construction monitoring and control for large-scale structures
- Reliability and durability of structures
